-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 15 August 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Abstract

Applicant is reminded of the proper language and format for an abstract of the disclosure. The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. The form and legal phraseology often used in patent claims, such as "means", *as in lines 9 and 15*, and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

Claim Objections

Claim 5 is objected to because in the last line, the ";" (semi-colon) should be changed to a --.-- (period). Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 3, 6, 10, and 13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 3 recites the limitation "said solar cell" in line 6. There is insufficient antecedent basis for this limitation in the claim. *To correct this*, it appears that --array-- should be inserted

Art Unit: 3634

after "cell" in line 6, in view of line 3 of the claim. This rejection is also applicable to claim 10 (see the last line thereof).

Claim 6 is rendered indefinite since it depends from itself. At this time, claim 6 has been examined as though it depends from claim 1.

Claim 13 is rendered indefinite since it is unclear whether the structure set forth therein, namely the solar cell array and the wiring circuit, is the same structure as set forth in claim 10 (see the last 4 lines of claim 10). *Accordingly*, the structural relationship between the elements is unclear since it appears that claim 13 is repeating structure already set forth.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 2 and 6 are rejected under 35 U.S.C. 102(e) as being anticipated by 6,464,088 (Caplan *et al.* '088).

Caplan *et al.* '088 disclose a remote operated (460) accessory rack (see Figure 15A) comprising a stationary housing (14, 16), a movable member (22, 26, 32, etc.) slidably carried on the housing (14, 16); the movable member having opposite ends with a selected end having an outwardly deployable article supporting means defining pivotal arms (34, 35, i.e., the arms are pivotal around the element 22); and motor means (28) operably connected between the housing

Art Unit: 3634

(14, 16) and the movable member and fixedly carried on the movable member (see Figure 3) for advancing and retracting the movable member out of and into the housing (14, 16), i.e., as the movable member moves around the interior perimeter of the housing, the member moves out of and into the housing at the bottom thereof.

Allowable Subject Matter

Claim 3 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims and thus claims 4, 5, and 7-9 objected to as being dependent upon a rejected base claim.

Claim 10 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action, claims 11, 12, and 14-16 are thus objected to as being dependent upon a rejected base claim, and thus claim 13 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

The prior art of record fails to show or suggest the rack, as claimed in claims 1 and 10, which comprises a "solar cell array" carried on the selected end of the movable member adjacent to the pivotal arms and an "extendable" wiring circuit coupled between the power source and array, as specifically called for in the claimed combination of claims 3 and 10.
